Bluetooth Audio

Typical requirements and known-answer test anchors

2.1 Ignition OFF response Page 2

2.2 Reception loss Page 3

2.4 Legacy pairing Page 4

2.5 Related audio routing Page 5

All requirements, document identities and tickets in this suite are invented. They are used only to validate version changes, references, retrieval and fail-closed behavior. Do not import these fixtures into an enterprise knowledge base.

2.1 Ignition OFF response

The controller shall stop Bluetooth playback within 500 ms after ignition becomes OFF, unless an emergency call is active.

2.2 Reception loss

When reception is lost, Bluetooth audio may be silent, but Bluetooth Audio mode shall remain active. If reception recovers within 3 seconds, playback shall resume automatically.

2.4 Legacy pairing

The legacy PIN pairing prompt shall appear before Bluetooth playback starts.

2.5 Related audio routing

See specification 990201 section 3.1 for emergency call audio priority.
