Audio Routing

Typical requirements and known-answer test anchors

3.1 Emergency call priority Page 2

3.2 Mute and stored volume Page 3

All requirements, document identities and tickets in this suite are invented. They are used only to validate version changes, references, retrieval and fail-closed behavior. Do not import these fixtures into an enterprise knowledge base.

3.1 Emergency call priority

An active emergency call shall have priority over Bluetooth playback. After the call ends, Bluetooth playback shall resume only if ignition is ON.

Evidence anchor: exact clause text, revision and physical page above.

Similarity is not duplicate proof. Missing mapping means no conformance verdict.

3.2 Mute and stored volume

A mute request shall not change the stored volume level. The same volume level shall be restored when mute is cancelled.

Evidence anchor: exact clause text, revision and physical page above.

Similarity is not duplicate proof. Missing mapping means no conformance verdict.
